We often take for granted that we understand our gifted children. However, all children are complex and being gifted adds unique dimensions to one's inner experience. This **FREE** workshop, presented by Working on Gifted Issues (WOGI) will address everyday challenges at school, at home, and in the community including peer relationships, perfectionism, family dynamics, and parental effectiveness. Please join us to learn ways to respond to your child's individual perspective, needs and concerns, and ways to support her/his growth and well-being.

Funded through a grant from the Florida Department of Education with support from the Florida Association for the Gifted (FLAG)
